

# AG ALUMNI SEED'S POPCORN DESCRIPTIONS

## EARLY SEASON

**NEW!** **AP2202 (42314C) ~ 58K/10g** Our newest and earliest hybrid. Good yields with high expansion. *No Doubt a Standout!*

**AP2501 ~ 62K/10g** AP2501 is a high yielding hybrid with very good expansion. You will want this in your line up!

**AP2503 ~ 66K/10g** A related hybrid to AP2501 with a medium kernel. This is an early, high yielding hybrid with excellent expansion and very good disease resistance. Try some!

**AP2504 ~ 61K/10g** A newer, early large kernel hybrid. AP2504 is high yielding with excellent expansion. Take a look - you won't be sorry!

## MID-SEASON

**AP4503 ~ 62K/10g** A newer, mid-season, large kernel hybrid. High expansion and outstanding yields.

**AP4505 ~ 57K/10g** A newer P802 type hybrid with mid-season maturity! Great yields, expansion, an extra-large kernel in a mid-season package.

**NEW!** **AP4506 (78242) ~ 56K/10g** A mid-season hybrid with exceptional popping expansion and a very large kernel. (48+).

## FULL SEASON

**AP6002 ~ 52K/10g** A full season hybrid with higher yields and larger kernels than P618 with mid-level expansion.

**NEW!** **AP6003 (51002) ~ 52K/10g** A new very large kernel hybrid. Its performance is comparable to AP8202 but with earlier maturity.

**AP8202 ~ 55K/10g** A very full season hybrid with P618 expansion, higher yields and similar kernel size. Performance has been strong in irrigated trials.

**P618 ~ 57K/10g** An industry standard. High expansion, high yields, and large grain for full season areas. Just about says it all!

**P630 ~ 59K/10g** A high-yielding, full-season hybrid with very good foliar disease resistance. Check this out for all of your full season needs.

**P802 ~ 56K/10g** A very full-season, large kernel hybrid with excellent disease resistance. Yields are very similar to P618.

## MUSHROOM

**AP4504M - Mushroom ~ 47K/10g** A very large kernel, mid-season hybrid with high yields and good mushroom percentage. Give it a try!
