

Download The Popcorn Board's Agri-Chemical Handbook Mobile App!

The same valuable content from the PDF version of the **Popcorn Agri-Chemical Handbook** is now available in a convenient mobile app, accessible for Android users in the Google Play store and for Apple users in the Apple Store!

Scan this QR code to go directly to the app in the Google Play or Apple Store.

You may visit www.popcorn.org/Popcorn-Handbook-App for convenient links to find the app in the Google Play and Apple Stores, or search in the appropriate store for "Popcorn Agri-Chemical" to find the app.

Once you've downloaded the app, you can access it using these credentials:

Username: **popcorn@popcorn.org**
Password: **handbook22**

After logging in, you can navigate the app using the table of contents on the main screen, or click on the "hamburger menu" icon in the top right corner  from anywhere in the app to access the detailed table of contents. If prompted, please accept to receive push notifications and automatic updates to the app.

Available from the main screen is the **Search Handbook** feature, allowing you to search in the app for any keyword, including all or part of a chemical name, common name, product name, or manufacturer name. Also included in the app are **links to product labels** (where available), providing additional key information for growers.

The Popcorn Agri-Chemical Handbook Mobile App is a **native app**, meaning that once you download and log into the app for the first time, you will not need a data connection to continue accessing the content in the app – great for use in the field where data connections might sometimes be unreliable. The only exception to this is with the links to product labels – you will need a data connection for these links to work. Once you use a link to access a product label, that label should be downloaded to your device and should be accessible to you in the future.

We hope you find the Popcorn Agri-Chemical Handbook Mobile App to be a valuable tool. Please contact us at popcorn@popcorn.org if you have any questions about the app or its use.
